Evaluation of proposals

STANDARD AWARD CRITERIA

EXCELLENCE

IMPACT

**QUALITY &
EFFICIENCY
OF THE ACTION**

✓ **ERC** frontier Research actions >> only EXCELLENCE

✓ **Innovation actions**>> higher weighting for "IMPACT"

Some tips on how to succeed

Start in time & choose your partners well

Avoid "recycling" of former projects or project partners which do not have a specific contribution to the topic

Check for eligibility & read the evaluation criteria – imagine what the evaluator will think

Excellent science is not enough: consider all the criteria & sub-criteria

Impact matters as much as excellence! → Check the expected impacts and scope of the topic in detail

Write clearly & respect the page limits - ask someone impartial to proof-read your proposal

Be coherent! Make sure that the chosen objectives are coherent with the foreseen project activities, the competence of the partners and the planned budget per activity.

Some tips on communication & dissemination

Communication and dissemination activities each have a specific scope

Ensuring project results are widely known and used by those interested, including policy makers

Ensuring uptake of project results enhances the added value of research & innovation funding

Dissemination & exploitation plan is mandatory

Communication and dissemination about the project and its results should start as soon as possible and be updated throughout the project's lifetime

Consider including the right skills for communication & dissemination in the project consortium from the start
